GREEN GLUE
noiseproof your life

- **Step 1:** screw the nozzle ring off of the front of the applicator gun barrel and place one of the dispensing tips inside the ring – then reattach.
- **Step 2:** cut the end of the dispensing tip to create a ½” opening.
- **Step 3:** dip the orange tip into the 5-gallon pail of Green Glue
- **Step 4:** while pressing the rod recoil button with your thumb, pull back the plunger rod with your other hand.
- **Step 5:** pull the trigger to dispense the Green Glue.
(Go around the perimeter of the drywall – leaving a 2” space from the edge)
- **Step 6:** provide full coverage of glue on the 4’ x 8’ sheet of drywall – apply 2 dispensers worth of glue.
- **Step 7:** screw the drywall into the first layer – stagger the joints of both layers
- **Step 8:** add caulk to the wall, floor and ceiling joints with acoustic caulk.
- **Step 9:** clean the applicator gun with soap and warm water – the barrel and plunger can be detached to make cleaning easier.
