

SilentPoly™ Acoustic Wall Panels are comprised of 100% polyester fiber (60% post-consumer material, 100% recyclable), bonded by using heat instead of traditional chemical binders. These panels are environmentally friendly – GREENGUARD Gold Certified, formaldehyde free, and contain no glues, binders, odors, or VOCs. These panels are also Class-A Fire Rated, moisture resistant, extremely resilient and impact resistant.

These panels offer a green, eco-friendly solution for sound absorption. These precision-cut 2' x 4' panels are rigid and durable, yet lightweight and simple to install. Not only do these panels look great, they also perform extremely well acoustically with an NRC rating of 0.70 as a wall panel.

Product Info:

- NRC rating of 0.70
- 1" thick, 24" x 48"
