Installation Guide: SilentFiber™ 2x4 Panels

Tools Required:
- Pencil, drill, screws, anchors (if necessary), leveling tool, and sharp-point impaling clips (included)
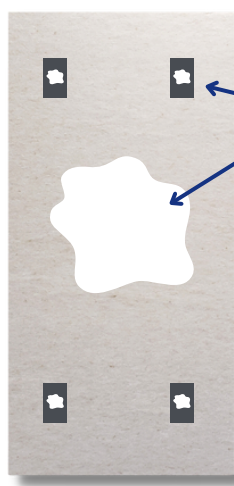

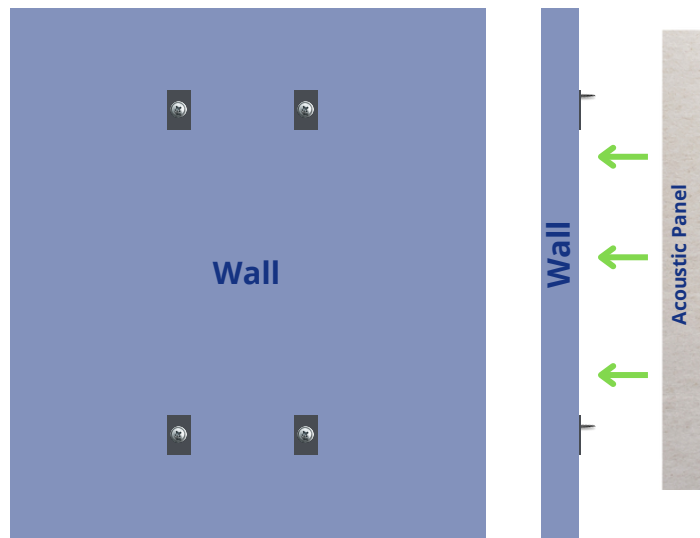

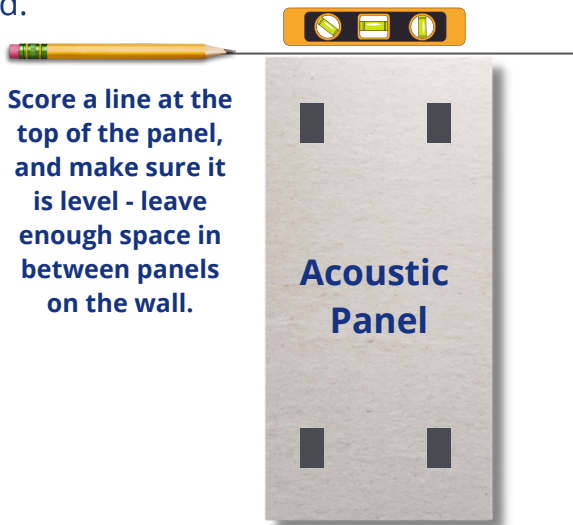

Sharp Point
Impaling Clip →

Wall Mounting Polyester Panels:

1.) Find a spot on the wall where each panel will be placed, keep all panels spaced out accordingly and level with one another.

2.) Using a pencil, score a small mark at the top of each panel.

3.) Using the impaling clip as a template, drill a hole in the wall for all 4 corners of the 2x4 panel.

4.) Screw the impaling clips to the wall (5-6" from each edge of the panel).

5.) Once the impaling clips are in place, take the panel press it firmly into the sharp points of the impaling clips - press on each corner and in the middle to insure the panel has a firm hold.

*For concrete walls:

- Use glues or adhesives to adhere the clip to the wall.
- Once the clips are dried in place, take the panel and press it firmly into the sharp points of the impaling clips - press on each corner and in the middle to insure the panel has a firm hold.

Score a line at the top of the panel, and make sure it is level - leave enough space in between panels on the wall.
