

# Installation Guide: Wall & Ceiling Diffusers

## Tools Required:

### For Method #1 (Wall Mounting):

- Drill, screws, anchors (if necessary), leveling tool, L-clips, wall bar, and Velcro strips

### For Method #2 (Ceiling Mounting):

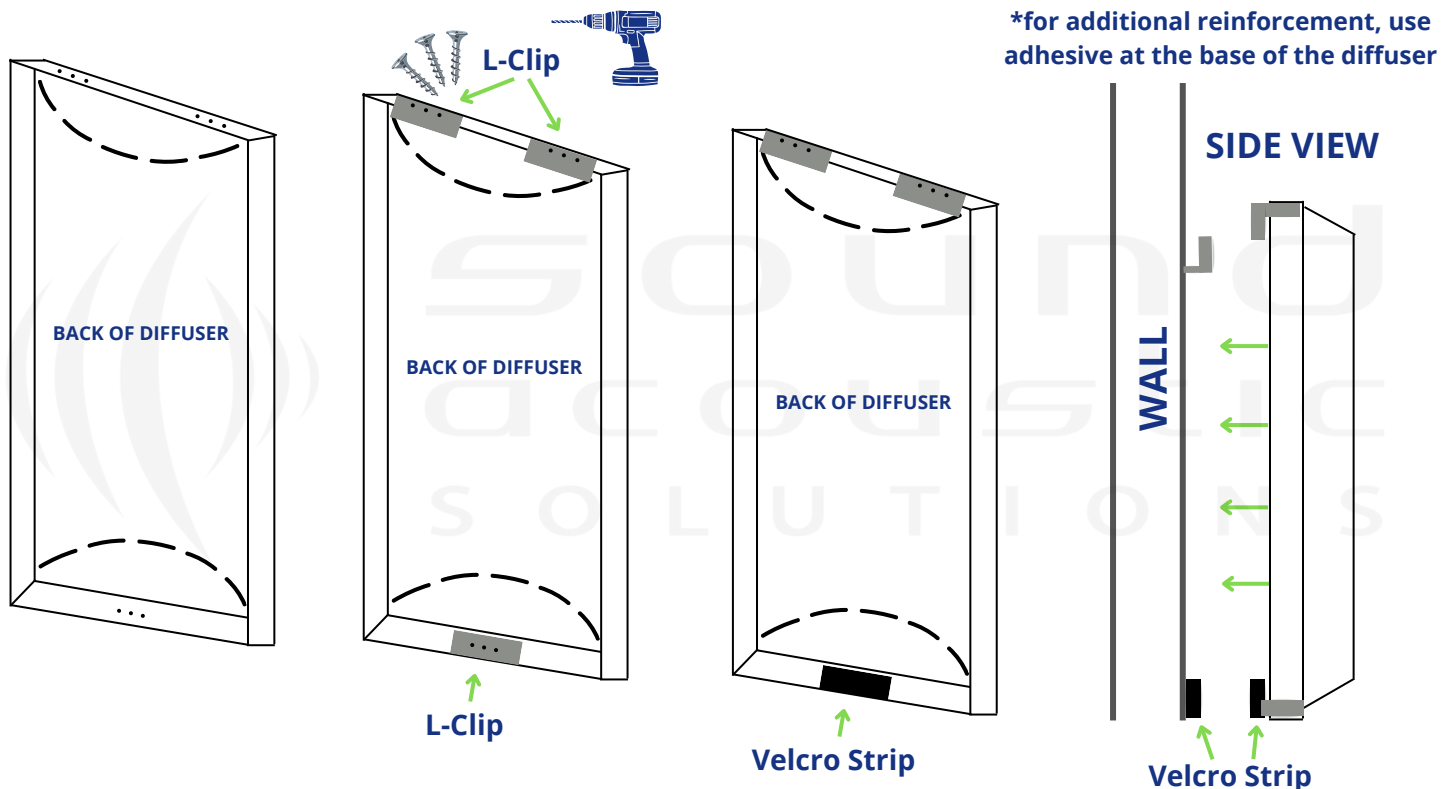

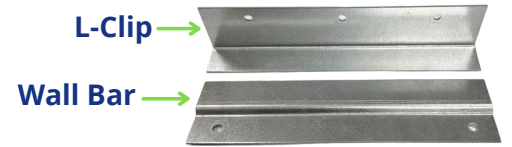

- All ceiling diffusers come with a flange for installing in a grid ceiling (2x2 or 2x4)

## Method #1:

### Direct Mount to Wall (Barrel Diffuser):

#### \*Vertical Wall Mount

- 1.) Using the L-clips as a template, drill holes in the top lip of the sound diffuser.
- 2.) Assemble the L-clip to the sound diffuser using a drill & screw.
- 3.) Screw the wall bar directly to the wall in accordance with each L-clip on the sound diffuser (be sure to use proper spacing, and make sure each wall bar is level).
- 4.) Apply a Velcro strip to the L-clip at the bottom of the diffuser, in line with the correct spot on the wall
- 4.) Interlock the L-clips and wall bars - make sure the diffuser is sitting flush with the wall and level.
- 5.) Press firmly on the bottom of the diffuser to catch and hold the Velcro strip on the wall.
